1. Introduction

This report presents the manual testing activities conducted for the Ayist Group website (<https://ayistgroup.com/>) using Jira Xray as the test management tool. The testing process focuses on evaluating the website's functionality, usability, and performance across different pages and features.

The Ayist Group website serves as a corporate platform providing information about company services, research and development activities, and contact mechanisms for potential clients. Our testing approach aims to ensure that all critical functionalities work as intended and provide a seamless user experience.

The scope of this testing includes navigation functionality, contact form validation, content accuracy verification, page load performance, and cross-browser compatibility assessment.

2. QA & Testing Processes

2.1 Testing Methodology

We implemented a systematic approach to manual testing following these key phases:

Phase 1: Requirement Analysis

- Analyzed the website structure and identified key functional areas
- Documented user workflows and critical paths
- Established testing priorities based on business impact

Phase 2: Test Planning

- Created detailed test cases in Jira Xray
- Defined test data requirements
- Established entry and exit criteria for testing

Phase 3: Test Execution

- Executed manual test cases systematically
- Recorded test results and captured evidence
- Logged defects with appropriate severity levels

Phase 4: Reporting and Analysis

- Generated test execution reports
- Analyzed defect patterns and trends
- Provided recommendations for improvement

2.2 Tools and Environment

Test Management Tool: Jira Xray

- Used for creating and managing test cases
- Tracked test execution status
- Linked defects to corresponding test cases
- Generated coverage and execution reports

Testing Environment:

- Operating Systems: Windows 10, macOS
- Browsers: Chrome (latest), Firefox (latest), Safari

- Network: Standard broadband connection
- Device Types: Desktop, mobile

2.3 Test Case Design Approach

Test cases were designed using the following techniques:

- **Boundary Value Analysis:** For form input validation
- **Equivalence Partitioning:** For different user scenarios
- **Guessing:** Based on common web application issues
- **User Journey Testing:** Following typical user workflows

3. Test Case Document

3.1 Test Case Summary

Test Scenario ID	Test Case ID	Test Case	Test Steps	Expected Results	Actual Result	Execute d or Not	Status (Pass/Fail)
1.1	1.1.1	Verify Home page navigation link	1.Open the website 2.Click on each navigation link: Home 3.Verify the correct pages load.	Navigate to the Home page	Navigated to the Home page	Executed	Pass
1.1	1.1.2	Verify Service page navigation link	1.Open the website 2.Click on each navigation link: Services 3.Verify the correct pages load.	Navigate to the Service page	Navigate to the Service page and to all the other 5 pages	Executed	pass
1.1	1.1.3	Verify R&D Unit page navigation link	1.Open the website 2.Click on each navigation link: R&D Unit 3.Verify the correct pages load.	Navigate to the R&D Unit page	Navigate to the R&D Unit page	Executed	pass
1.1	1.1.4	Verify Contact page navigation link	1.Open the website 2.Click on each navigation link: Contact 3.Verify the correct pages load.	Navigate to the Contact page	Navigate to the Contact page	Executed	pass
1.1	1.1.5	Verify Careers page navigation link	1.Open the website 2.Click on each navigation link: Careers	Navigate to the Careers page	Navigate to the Careers page	Executed	pass

			3. Verify the correct page load.			
1.1	1.1.6	Verify About Us page navigation link	1. Open the website 2. Click on each navigation link: About Us 3. Verify the correct page load.	Navigate to the About Us page	Navigate to the About Us page	Executed Pass
1.1	1.1.7	Verify About Us page our products link	1. Open the website 2. Click on each navigation link: Our Product 3. Verify the correct page load.	Navigate to the our products page	Navigate to the Our Product page	Executed Pass
1.2	1.2.1	Validate Header Links	1. Hover over all header links 2. Click each link	All links open without errors	All links open without errors	Executed Pass
1.2	1.2.2	Validate Body Links	1. Hover over body links 2. Click each link	All links open without errors	All links open without errors	Executed Pass
1.2	1.2.3	Validate Footer Links	1. Hover over footer links 2. Click each link	All links open without errors	All links open without errors	Executed Pass
2.1	2.1.1	Submit Contact Form – Valid Data	1. Open Contact page 2. Enter valid Name, Email, Phone, Message 3. Click “Submit”	Form submits successfully with confirmation	Form submits successfully with confirmation	Executed Pass
2.2	2.2.1	Submit Contact Form – Invalid Email	1. Open Contact page 2. Enter invalid email (e.g., user@.) 3. Fill other fields correctly 4. Click “Submit”	Error message displayed for invalid email format	Error message displayed for invalid email form	Executed Pass

2.2	2.2.2	Submit Contact Form – Blank Email	1. Open Contact page 2. Leave Email field blank 3. Fill other fields correctly 4. Click “Submit”	Validation error for missing email	Error message displayed " This field is required"	Executed	Pass
2.3	2.3.1	Submit Contact Form – Empty Fields	1. Open Contact page 2. Leave all required fields empty 3. Click “Submit”	Validation error messages displayed	Validation error messages displayed	Executed	Pass
3.1	3.1.1	Validate AI & Machine Learning in Service Description	1. Open Services page 2. Click on Service AI & Machine Learning link	Service AI & Machine Learning description displayed	Service AI & Machine Learning description displayed	Executed	Pass
3.1	3.1.2	Validate Custom Software Development in Service Description	1. Open Services page 2. Click on Service Custom Software Development link	Service Custom Software Development description displayed	Service Custom Software Development description displayed	Executed	Pass
3.1	3.1.3	Validate Web & Mobile App Development in Service Description	1. Open Services page 2. Click on Web & Mobile App Development link	Service Web & Mobile App Development description displayed	Service Web & Mobile App Development description displayed	Executed	Pass
3.1	3.1.4	Validate Immersive Tech & Smart Visual Solutions in Service Description	1. Open Services page 2. Click on Immersive Tech & Smart Visual Solutions link	Service Immersive Tech & Smart Visual Solutions description displayed	Service Immersive Tech & Smart Visual Solutions description displayed	Executed	Pass

3.1	3.1.5	Validate IT Support & Consulting in Service Description	1.Open Service page 2.Click on IT Support & Consulting link	Service IT Support & Consulting description displayed	Service IT Support & Consulting description displayed	Executed	Pass
3.2	3.2.1	Validate Footer – Contact Details	1. Scroll to footer 2. Verify address, phone, email	Contact details correct	Email links does not open default mail client. phone number is not functionable	Executed	Fail
3.2	3.2.2	Validate Footer – Social Media Links-Facebook	1. Scroll to footer 2. Click Facebook icon	Open AYIST Group facebook page	Open AYIST Group facebook page	Executed	Pass
3.2	3.2.3	Validate Footer – Social Media Links-Instagram	1. Scroll to footer 2. Click Instagram icon	Open AYIST Group instagram page	Open AYIST Group instagram page	Executed	Pass
3.2	3.2.4	Validate Footer – Social Media Links- GitHub	1. Scroll to footer 2. Click GitHub icon	Open AYIST Group GitHub account	Open AYIST Group GitHub account	Executed	Pass
3.2	3.2.5	Validate Footer – Social Media Links-Youtube	1. Scroll to footer 2. Click Youtube icon	Open AYIST Group youtube account	Open AYIST Group youtube account	Executed	Pass
3.2	3.2.6	Validate Footer – Social Media Links-LinkedIn	1. Scroll to footer 2. Click LinkedIn icon	Open AYIST Group LinkedIn page	Open AYIST Group LinkedIn page	Executed	Pass
3.2	3.2.7	Validate Footer – Copyright	1. Scroll to footer	Copyright text is present and correct	Copyright text is present and correct	Executed	Pass

4.1	4.1.1	Browser Compatibility – Google	1. Open site in Google 2. Verify layout, alignment, and functions	Works consistently	Works consistently	Executed	Pass
4.1	4.1.2	Browser Compatibility – Chrome	1. Open site in Chrome 2. Verify layout, alignment, and functions	Works consistently	Works consistently	Executed	Pass
4.1	4.1.3	Browser Compatibility – Firefox	1. Open site in Firefox 2. Verify layout, alignment, and functions	Works consistently	Works consistently	Executed	Pass
4.1	4.1.4	Browser Compatibility – Edge	1. Open site in Edge 2. Verify layout, alignment, and functions	Works consistently	Works consistently	Executed	Pass
4.1	4.1.5	Browser Compatibility – Safari	1. Open site in Safari 2. Verify layout, alignment, and functions	Works consistently	N/A	Not executed	N/A
5.1	5.1.1	Measure Load Time – Home Page	1. Open Chrome 2. Open DevTools → Network tab 3. Reload Home page 4. Record load time	Page loads in < 3 seconds	Page loads in < 3 seconds 1000ms	Executed	Pass
5.1	5.1.2	Measure Load Time – Services Page	1. Open Chrome 2. Open DevTools → Network tab 3. Reload Services page 4. Record load time	Page loads in < 3 seconds	Page loads in < 3 seconds 2000ms	Executed	Pass

5.1	5.1.3	Measure Load Time – Our Products Page	1. Open Chrome 2. Open DevTools → Network tab 3. Reload Our Products page 4. Record load time	Page loads in < 3 seconds	Page loads in < 3 seconds 2000ms	Executed	Pass
5.1	5.1.4	Measure Load Time – R&D Unit Page	1. Open Chrome 2. Open DevTools → Network tab 3. Reload R&D Unit page 4. Record load time	Page loads in < 3 seconds	Page loads in < 3 seconds 2000ms	Executed	Pass
5.1	5.1.5	Measure Load Time – Contact Page	1. Open Chrome 2. Open DevTools → Network tab 3. Reload Contact page 4. Record load time	Page loads in < 3 seconds	Page takes more than 3 seconds to load	Executed	Fail
5.1	5.1.6	Measure Load Time – Careers Page	1. Open Chrome 2. Open DevTools → Network tab 3. Reload Careers page 4. Record load time	Page loads in < 3 seconds	Page takes more than 3 seconds to load	Executed	Fail
5.1	5.1.7	Measure Load Time – About Us Page	1. Open Chrome 2. Open DevTools → Network tab 3. Reload About Us page 4. Record load time	Page loads in < 3 seconds	Page loads in < 3 seconds	Executed	Pass
6.1	6.1.1	Verify Images – Home Page	1. Open Home page 2. Inspect all images	All images load without broken icons	All images load without broken icons	Executed	Pass

6.1	6.1.2	Verify Images – Services Page	1. Open Services page 2. Inspect all images	All images load without broken icons	All images load without broken icons	Executed	Pass
6.1	6.1.3	Verify Images – Our Products Page	1. Open Our Product page 2. Inspect all images	All images load without broken icons	All images load without broken icons	Executed	Pass
6.1	6.1.4	Verify Images – R&D Unit Page	1. Open R&D Unit page 2. Inspect all images	All images load without broken icons	All images load without broken icons	Executed	Pass
6.1	6.1.5	Verify Images – Contact Page	1. Open Contact page 2. Inspect all images	All images load without broken icons	All images load without broken icons	Executed	Pass
6.1	6.1.6	Verify Images – Careers Page	1. Open Careers page 2. Inspect all images	All images load without broken icons	All images load without broken icons	Executed	Pass
6.1	6.1.7	Verify Images – About Us Page	1. Open About Us page 2. Inspect all images	All images load without broken icons	All images load without broken icons	Executed	Pass
7.1	7.1.1	Verify button hover effect – Home Page	1. Open Home page 2. Hover over all primary buttons (e.g., “Get Free Quote”) 3. Observe hover behavior	Hover effect is consistent	Hover effect is consistent	Executed	Pass
7.1	7.1.2	Verify button hover effect – Services Page	1. Open Services page 2. Hover over all primary buttons 3. Observe hover behavior	Hover effect is consistent	Hover effect is consistent	Executed	Pass

7.1	7.1.3	Verify button hover effect – Our Products Page	1. Open Products page 2. Hover over all primary buttons 3. Observe hover behavior	Hover effect is consistent	Hover effect is consistent	Executed	Pass
7.1	7.1.4	Verify button hover effect – R&D Unit Page	1. Open R&D Unit page 2. Hover over buttons/links 3. Observe hover behavior	Hover effect is consistent	Hover effect is consistent	Executed	Pass
7.1	7.1.5	Verify button hover effect – Contact Page	1. Open Contact page 2. Hover over form buttons (e.g., “Submit”) 3. Observe hover behavior	Hover effect is consistent	Hover effect is consistent	Executed	Pass
7.1	7.1.6	Verify button hover effect – Careers Page	1. Open Careers page 2. Hover over application/CTA buttons 3. Observe hover behavior	Hover effect is consistent	Hover effect is consistent	Executed	Pass
7.1	7.1.7	Verify button hover effect – About Us Page	1. Open About Us page 2. Hover over all primary buttons 3. Observe hover behavior	Hover effect is consistent	Hover effect is consistent	Executed	Pass
8.1	8.1.1	Verify heading styles – Home Page	1. Open Home page 2. Inspect H1 and H2 using DevTools 3. Check font style, size, hierarchy	Consistent heading styling	Consistent heading styling	Executed	Pass

8.1	8.1.2	Verify heading styles – Services Page	1. Open Services page 2. Inspect headings 3. Compare with other pages	Consistent heading styling	Consistent heading styling	Executed	Pass
	8.1.3	Verify heading styles – Our Products Page	1. Open Products page 2. Inspect headings 3. Compare with standards	Consistent heading styling	Consistent heading styling	Executed	Pass
	8.1.4	Verify heading styles – R&D Unit Page	1. Open R&D Unit page 2. Inspect headings 3. Verify hierarchy	Consistent heading styling	Consistent heading styling	Executed	Pass
	8.1.5	Verify heading styles – Contact Page	1. Open Contact page 2. Inspect headings 3. Check only one H1 exists	Consistent heading styling	Consistent heading styling	Executed	Pass
	8.1.6	Verify heading styles – Careers Page	1. Open Careers page 2. Inspect headings 3. Compare with others	Consistent heading styling	Consistent heading styling	Executed	Pass
8.1	8.1.7	Verify heading styles – About Us Page	1. Open About Us page 2. Inspect headings 3. Compare with other pages	Consistent heading styling	Consistent heading styling	Executed	Pass
9.1	9.1.1	Verify language consistency – Home Page	1. Open Home page 2. Review all text 3. Check for untranslated/mixed terms	All content in English, consistent	All content in English no untranslated terms	Executed	Pass

9.1	9.1.2	Verify language consistency – Services Page	1. Open Services page 2. Review all text 3. Check date/time formats	All content in English, consistent	All content in English no untranslated terms	Executed	Pass
9.1	9.1.3	Verify language consistency – Our Products Page	1. Open Products page 2. Review all text 3. Check for untranslated terms	All content in English, consistent	All content in English no untranslated terms	Executed	Pass
9.1	9.1.4	Verify language consistency – R&D Unit Page	1. Open R&D Unit page 2. Review all text 3. Check for mixed language	All content in English, consistent	All content in English no untranslated terms	Executed	Pass
9.1	9.1.5	Verify language consistency – Contact Page	1. Open Contact page 2. Check form labels and text 3. Ensure English only	All content in English, consistent	All content in English no untranslated terms	Executed	Pass
9.1	9.1.6	Verify language consistency – Careers Page	1. Open Careers page 2. Review job descriptions 3. Check for mixed terms	All content in English, consistent	All content in English no untranslated terms	Executed	Pass
9.1	9.1.7	Verify language consistency – About Us Page	1. Open About Us page 2. Review text 3. Ensure English only	All content in English, consistent	All content in English no untranslated terms	Executed	Pass
10.1	10.1.1	Verify mobile orientation – Home Page	1. Open Home page on mobile 2. Rotate from portrait to landscape 3. Observe layout	Layout adapts without distortion	Layout adapts without distortion	Executed	Pass
10.1	10.1.2	Verify mobile orientation – Services Page	1. Open Services page on mobile 2. Rotate device	Layout adapts properly	Layout adapts without distortion	Executed	Pass

3. Observe layout

10.1	10.1.3	Verify mobile orientation – Our Products Page	1. Open Products page on mobile 2. Rotate device 3. Observe layout	Layout adapts properly	Layout adapts without distortion	Executed	Pass
10.1	10.1.4	Verify mobile orientation – R&D Unit Page	1. Open R&D Unit page on mobile 2. Rotate device 3. Observe layout	Layout adapts properly	Layout adapts without distortion	Executed	Pass
10.1	10.1.5	Verify mobile orientation – Contact Page	1. Open Contact page on mobile 2. Rotate device 3. Check form alignment	Layout adapts without overlap	Layout adapts without distortion	Executed	Pass
10.1	10.1.6	Verify mobile orientation – Careers Page	1. Open Careers page on mobile 2. Rotate device 3. Observe layout	Layout adapts properly	Layout adapts without distortion	Executed	Pass
10.1	10.1.7	Verify mobile orientation – About Us Page	1. Open About Us page on mobile 2. Rotate device 3. Observe layout	Layout adapts properly	Layout adapts without distortion	Executed	Pass

4. Ayist Group Website Manual Testing

Test Results by Functional Area

1. Navigation Testing (Test Scenario 1.1 & 1.2)

- **Total Cases:** 10
- **Status:** All Passed
- **Coverage:** Main navigation links (7), header/body/footer links (3)
- **Result:** Complete navigation functionality verified

2. Contact Form Testing (Test Scenario 2.1-2.3)

- **Total Cases:** 4
- **Status:** All Passed
- **Coverage:** Valid data, invalid email, blank fields, empty form validation
- **Result:** Form validation and submission working correctly

3. Service Description & Footer Testing (Test Scenario 3.1 & 3.2)

- **Total Cases:** 12
- **Status:** 11 Passed, 1 Failed
- **Coverage:** 5 service descriptions + 7 footer elements
- **Failed Test:** Footer contact details (TC 3.2.1) - Email and phone links non-functional

4. Browser Compatibility Testing (Test Scenario 4.1)

- **Total Cases:** 5
- **Status:** 4 Passed, 1 Not Executed
- **Coverage:** Google, Chrome, Firefox, Edge tested successfully
- **Not Executed:** Safari testing (TC 4.1.5)

5. Performance Testing - Load Times (Test Scenario 5.1)

- **Total Cases:** 7
- **Status:** 5 Passed, 2 Failed
- **Results:**
 - Home Page: 1000ms (Pass)
 - Services Page: 2000ms (Pass)
 - Our Products Page: 2000ms (Pass)
 - R&D Unit Page: 2000ms (Pass)
 - About Us Page: <3 seconds (Pass)
 - Contact Page: >3 seconds (Fail)
 - Careers Page: >3 seconds (Fail)

6. Image Verification Testing (Test Scenario 6.1)

- **Total Cases:** 7
- **Status:** All Passed
- **Coverage:** All website pages tested for image loading
- **Result:** No broken images found

7. Button Hover Effects Testing (Test Scenario 7.1)

- **Total Cases:** 7
- **Status:** All Passed
- **Coverage:** Interactive elements across all pages
- **Result:** Consistent hover behavior verified

8. Heading Styles Testing (Test Scenario 8.1)

- **Total Cases:** 7
- **Status:** All Passed
- **Coverage:** Typography hierarchy and consistency
- **Result:** Proper heading structure maintained

9. Language Consistency Testing (Test Scenario 9.1)

- **Total Cases:** 7
- **Status:** All Passed
- **Coverage:** English language consistency verification
- **Result:** No mixed language content detected

10. Mobile Responsiveness Testing (Test Scenario 10.1)

- **Total Cases:** 7
- **Status:** All Passed
- **Coverage:** Portrait and landscape orientation testing
- **Result:** Proper mobile adaptation confirmed

Critical Defects Identified

Failed Test Cases

1. TC 3.2.1 - Footer Contact Details

- **Issue:** Email links do not open default mail client
- **Issue:** Phone number is not clickable/functional
- **Severity:** High
- **Impact:** Users cannot easily initiate contact through footer

2. TC 5.1.5 - Contact Page Load Time

- **Issue:** Page loading exceeds 3-second threshold
- **Severity:** Medium
- **Impact:** Poor user experience for contact inquiries

3. TC 5.1.6 - Careers Page Load Time

- **Issue:** Page loading exceeds 3-second threshold
- **Severity:** Medium
- **Impact:** Potential job applicants may abandon the process

Incomplete Test Cases

1. TC 4.1.5 - Safari Browser Compatibility

- **Status:** Not executed
- **Reason:** Testing environment limitation
- **Recommendation:** Complete Safari testing in next cycle

Performance Analysis

Page Load Performance Rankings

1. **Home Page:** 1000ms (Optimal)
2. **Services/Products/R&D/About:** 2000ms (Good)
3. **Contact/Careers:** >3000ms (Poor - Requires optimization)

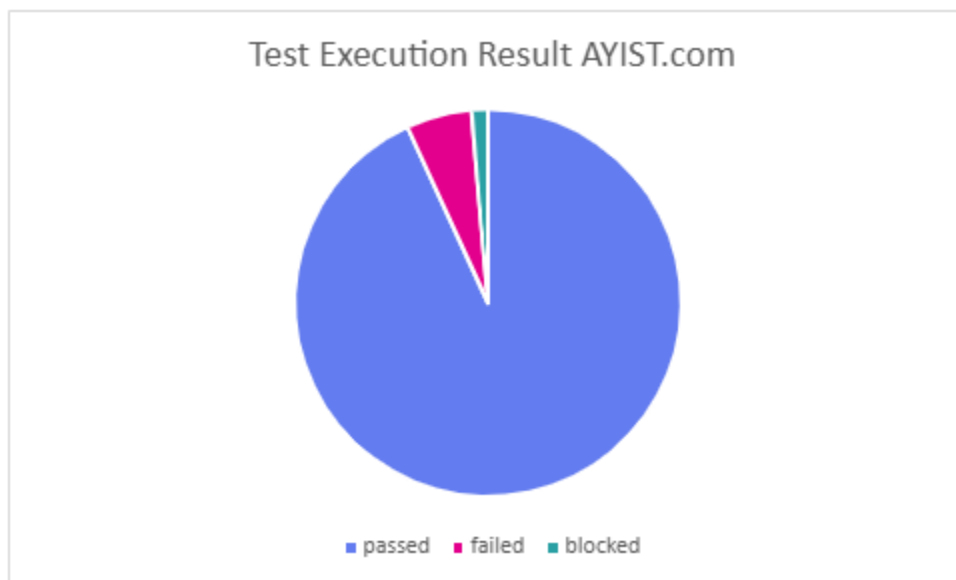

Browser Compatibility Status

- **Chrome:** Fully compatible
- **Firefox:** Fully compatible
- **Edge:** Fully compatible
- **Google:** Fully compatible
- **Safari:** Testing incomplete

Website Strengths

1. **Navigation System:** Complete functionality across all pages and sections
2. **Form Validation:** Robust contact form with proper error handling
3. **Content Quality:** Consistent service descriptions and information accuracy
4. **Visual Elements:** All images render correctly without broken links
5. **User Interface:** Consistent styling and interactive elements
6. **Mobile Support:** Proper responsive behavior across orientations
7. **Cross-Browser Support:** Works reliably on major browsers tested

5. Test Execution Analysis

Test Summary	
Metric	Value
Total test cases	73
Executed test cases	72
passed	69
failed	3
blocked	1
execution rate(%)	98.63013699
pass rate (%)	95.83333333

Execution Rate: 98.6% Pass Rate: 95.8% (based on executed test cases)

This pie chart clearly shows the distribution of our 73 test cases, and the numbers tell a straightforward story about the website's current state.

Testing Coverage:

We have achieved 98.6% execution rate, which means our team was thorough in running nearly all planned tests. Only one test case remained incomplete, which was the Safari browser compatibility test case.

Quality Assessment:

The large blue section of the pie chart represents 69 passed test cases, making up 95.8% of executed tests. This indicates the website's core functionality is working properly. The pink slice shows 3 failed tests, while the green section represents 1 blocked test.

Areas of Concern:

There are 3 failed test cases founded here:

- Footer contact links not functioning properly
- Contact page loading too slowly
- Careers page performance issues

The visual representation confirms that while the website has a solid foundation, there are specific areas that need immediate attention. The high pass rate suggests users can navigate and use most features without problems, but the failed tests affect important user interaction points.

The performance issues on Contact and Careers pages could directly impact business operations. When potential clients or job candidates encounter slow loading times, they may leave before completing their intended actions.

The chart demonstrates that the testing was comprehensive and the website is largely functional, but the identified issues require prompt resolution to ensure optimal user experience.

6.Screenshots Of Jira

The screenshot shows the Jira interface for the 'AYIST WEBSITE TEST' project. The 'AWT board' is selected, and the view is set to 'List'. The board displays three issues:

Type	Key	Summary	Status	Comments	Sprint
✖	AWT-3	Phone number is plain text ,not functional. Email is plain ...	TO DO	Add comment	AWT Sprint 1
✖	AWT-6	Contact Page took more than 3 seconds to load	TO DO	Add comment	AWT Sprint 1
✖	AWT-11	careers page took more than 3 seconds to load	TO DO	Add comment	AWT Sprint 1

Bugs reported to jira.

The screenshot shows the 'Tests List' for the 'AYIST WEBSITE TEST' project. The table displays the following data:

Key	Summary	Test Type	Status	Status +
AWT-1	Validate Footer – Contact Details	Manual	DONE	FAILED
AWT-4	Measure Load Time – Contact Page	Manual	DONE	FAILED
AWT-7	Test Scenario: Measure Load Time – Careers Page	Manual	DONE	FAILED
AWT-9	Measure Load Time – Careers Page	Manual	DONE	PASSED
AWT-12	Verify Home page navigation link	Manual	DONE	PASSED
AWT-14	Verify Services page navigation link	Manual	DONE	PASSED
AWT-16	Verify R&D Unit page navigation link	Manual	DONE	PASSED
AWT-18	Verify Contact page navigation link	Manual	DONE	PASSED
AWT-20	Verify Careers page navigation link	Manual	DONE	PASSED
AWT-22	Browser Compatibility – Edge	Manual	DONE	TO DO

Test list logged to jira

Description

Action	Data	Expected Result	Actual Result
1. Open a browser 2. Navigate to the website's homepage. 3. Scroll down to the footer section. 4. Locate the Contact Us block containing 5. Verify that 6. Check if the phone number is clickable 7. Check if the email address is clickable 8. Verify whether the address is linked to Google Maps 9. Record the result of each validation (phone, email, address).	• Phone number: +48515219629 • Email: contact@ayistgroup.com • Address: Swieradowska 47, Warsaw, 02-662, Poland	• The phone number is displayed clearly and matches the expected number. • The email address is displayed correctly with no typos. • The address is displayed correctly and formatted properly. • Phone no clicking should trigger the device's dialer (on mobile) or show dialing prompt. • Email address clicking should open the default email client with recipient pre-filled. • Address should be correct and optionally linked to map.	-

Generated at Fri Sep 19 05:55:34 UTC 2025 by Kushani Perera using Jira 1001.0.0-SNAPSHOT#100290-
rev:3b4b9e0e710f8f1ba396aef24501d51d1b6e3bed.

7.Suggestions

Immediate Fixes Required:

1. Fix footer contact links - email and phone buttons don't work, preventing users from contacting the company
2. Optimize Contact and Careers page loading times - both exceed 3 seconds which affects user experience
3. Complete Safari browser testing to ensure full compatibility coverage

Testing Process Improvements:

1. Set up automated performance monitoring for page load times
2. Include accessibility testing in future test cycles
3. Add security testing for form submissions
4. Create regression test suites for future releases

8.Final Conclusion

Manual testing was thoroughly conducted with 98.6% execution rate and 95.8% pass rate. The website functions well for basic operations - navigation works correctly, forms validate properly, images load without issues, and mobile responsiveness is solid.

However, three critical issues need fixing before the website can provide optimal user experience. The broken contact links directly impact business operations since users cannot reach the company easily. The slow loading on Contact and Careers pages may cause potential clients and job applicants to leave before completing their intended actions.

The testing approach using Jira Xray was systematic and covered all major functional areas. Test case design was comprehensive, covering positive and negative scenarios across different browsers and devices.

Overall, the website has a solid foundation but requires immediate attention to the identified defects to ensure business objectives are met. The high pass rate indicates good development quality, while the specific failures highlight areas where user experience improvements are needed.
